

Declaration of UL94 Conformity

UL94 V0 flame retardant PA

is in full conformity with the applicable requirements of the relevant UL Standards concerning material flammability classifications.

UL Standard Referenced: UL 94 – Standard for Tests for Flammability of Plastic Materials for Parts in Devices and Appliances. This standard has been utilized as the basis for determining the product's flammability classification.

We hereby declare that the modular belts manufactured are produced using PA6-based thermoplastic material that has been certified in accordance with UL 94 – Standard for Tests for Flammability of Plastic Materials for Parts in Devices and Appliances.

The base material used in our production process has been tested and classified with a Flame Rating of V-0 at the following thicknesses:

- 0.75 mm – V-0
- 1.6 mm – V-0
- 3.0 mm – V-0

These classifications were determined under standard UL 94 test procedures.
